## Non-GAAP Financial Measures

This press release includes discussions of financial measures that have not been determined in accordance with U.S. Generally Accepted Accounting Principles (GAAP). These measures include earnings (loss) before interest, income taxes, depreciation and amortization (EBITDA) and Adjusted EBITDA. We include these measurements to enhance the understanding of our operating performance. We believe that EBITDA, considered along with net earnings (loss), is a relevant indicator of trends relating to cash generating activity of our operations. Adjusted EBITDA excludes the effect of share-based compensation expense and other non-cash generating activity such as impairments and the write-off of deferred financing costs. We believe excluding these costs provides a consistent comparison of the cash generating activity of our operations. We believe that EBITDA and Adjusted EBITDA are useful to investors as they facilitate a comparison of our operating performance to other companies who also use EBITDA and Adjusted EBITDA as supplemental operating measures. These non-GAAP financial measures supplement our GAAP disclosures and should not be considered an alternative to the GAAP measures. These non-GAAP measures may not be entirely comparable to similarly titled measures used by other companies due to potential differences among calculations methodologies. A reconciliation of these non-GAAP financial measures to their most directly comparable financial measure prepared in accordance with GAAP is included in the tables that follow.
