

Universal Stainless Reports That the North Jackson, Ohio, Forge Is Back in Full Operation

June 27, 2019

- Electrical and hydraulic repairs are completed
- All other North Jackson production units continue to operate
- No impact to product delivery schedules as a result of the fire

BRIDGEVILLE, Pa., June 27, 2019 (GLOBE NEWSWIRE) -- **Universal Stainless & Alloy Products, Inc. (Nasdaq: USAP)** today reported that the radial forge at their North Jackson, OH facility was tested and resumed production activities as of Saturday June 22, 2019. The recent fire at the facility was contained to the forge machine and resulted in electrical and hydraulic associated damage. Repairs have been made and there is no impact to the product delivery schedules.

As previously reported, there were no injuries associated with the fire and all other production units at the facility continued to operate.

Chairman, President and CEO Dennis Oates commented: "We are very pleased that this incident was resolved quickly, and we are able to continue our forge production efforts. Our employees stepped up and completed the repairs in the most efficient manner while others continued to focus on production. I want to thank all of the employees at the North Jackson facility for their efforts and I also want to thank the outside suppliers that helped us at a moment's notice and worked around the clock to assist us in getting back into operation."

Forward-Looking Information Safe Harbor

Except for historical information contained herein, the statements in this release are forward-looking statements that are made pursuant to the "safe harbor" provision of the Private Securities Litigation Reform Act of 1995. Forward-looking statements involve known and unknown risks and uncertainties that may cause the Company's actual results in future periods to differ materially from forecasted results. Those risks include, among others, the Company's ability to maintain its relationships with its significant customers and market segments; the Company's response to competitive factors in its industry that may adversely affect the market for finished products manufactured by the Company or its customers; the Company's ability to compete successfully with domestic and foreign producers of specialty steel products and products fashioned from alternative materials; the demand for the Company's products and the prices at which the Company is able to sell its products in the aerospace industry, from which a substantial amount of our sales is derived; the Company's ability to develop, commercialize, market and sell new applications and new products; the receipt, pricing and timing of future customer orders; the impact of changes in the Company's product mix on the Company's profitability; the Company's ability to maintain the availability of raw materials and operating supplies with acceptable pricing; the availability and pricing of electricity, natural gas and other sources of energy that the Company needs for the manufacturing of its products; risks related to property, plant and equipment, including the Company's reliance on the continuing operation of critical manufacturing equipment; the Company's success in timely concluding collective bargaining agreements and avoiding strikes or work stoppages; the Company's ability to attract and retain key personnel; the Company's ongoing requirement for continued compliance with laws and regulations, including applicable safety and environmental regulations; the ultimate outcome of the Company's current and future litigation matters; the Company's ability to meet its debt service requirements and to comply with applicable financial covenants; risks associated with conducting business with suppliers and customers in foreign countries; risks related to acquisitions that the Company may make; the Company's ability to protect its information technology infrastructure against service interruptions, data corruption, cyber-based attacks or network security breaches; the impact on the Company's effective tax rates of changes in tax rules, regulations and interpretations in the United States and other countries where it does business; and the impact of various economic, credit and market risk uncertainties. Many of these factors are not within the Company's control and involve known and unknown risks and uncertainties that may cause the Company's actual results in future periods to be materially different from any future performance suggested herein. Any unfavorable change in the foregoing or other factors could have a material adverse effect on the Company's business, financial condition and results of operations. Further, the Company operates in an industry sector where securities values may be volatile and may be influenced by economic and other factors beyond the Company's control. Certain of these risks and other risks are described in the Company's filings with the Securities and Exchange Commission (SEC) over the last 12 months, copies of which are available from the SEC or may be obtained upon request from the Company.
